THE WORLD BIBLIOGRAPHICAL SERIES

This series, which is principally designed for the English speaker, will eventually cover every country (and many of the world's principal regions), each in a separate volume comprising annotated entries on works dealing with its history, geography, economy and politics; and with its people, their culture, customs, religion and social organization. Attention will also be paid to current living conditions – housing, education, newspapers, clothing, etc. – that are all too often ignored in standard bibliographies; and to those particular aspects relevant to individual countries. Each volume seeks to achieve, by use of careful selectivity and critical assessment of the literature, an expression of the country and an appreciation of its nature and national aspirations, to guide the reader towards an understanding of its importance. The keynote of the series is to provide, in a uniform format, an interpretation of each country that will express its culture, its place in the world, and the qualities and background that make it unique. The views expressed in individual volumes, however, are not necessarily those of the publisher.

Indexes

There follow three separate indexes: authors (including editors, compilers, contributors, translators and illustrators); titles of publications; and subjects. Title entries are italicized and refer either to the main titles or to other works cited in the annotations. The introductory definite or indefinite article is omitted. The numbers refer to bibliographical entries, rather than page numbers. Individual index entries are arranged in alphabetical sequence.
